Dumpster & Chute

All Purpose Deodorizer

Background

Trash dumpsters, garbage cans and areas around them are frequently the source of complaints due to odor. Situations involving unclean and smelly dumpsters can lead to serious health code violations. Odorcide® Dumpster & Chute works through a process of counteraction and absorption to safely, but effectively eliminate the odor. Sold as a concentrate, the product is diluted with water and applied using a variety of sprayer applications.

Uses

- Effectively used to eliminate trash odor generated from hotels, hospitals, restaurants, construction sites, offices, industrial plants and many more.
- Designed to work in tank, trigger and end-of-hose sprayer applications to eliminate odors associated with dumpsters and dumpster pads.
- Can also be used in sprayer applications to eliminate odor in garbage chutes and trash cans.

Directions for Use

ODORCIDE® Dumpster & Chute Dilution

Sprayer will dilute at a rate of 1oz to 1 gallon. Attach the water hose to the sprayer. Remove the lid from the 32oz bottle and insert the fill tube. Twist the sprayer cap on tightly. Set the ON/OFF dial to OFF and turn on the water. Turn the dial to the WATER only position until the water is flowing freely. Note: You will need to bend the protective stop tab in slightly when turning the dial. Once water is flowing freely turn the dial to the ON position and apply where needed. When done turn the dial to OFF position and turn the water off. Turn the dial to the ON position to release the pressure before removing the sprayer from the application bottle. Use the 64oz concentrate to refill the application bottle as needed.

When garden hose is unavailable:

Trash Chutes: Add 1oz per gallon to a pump-up style sprayer. Begin on the top floor of the trash chute. Spray all areas inside and out allowing product to run down the sides of the chute. Repeat this process on each level. Allow all treated areas to air dry.

Dumpsters, Compactors & Porta Potty: Add 1oz per gallon to a pump-up style sprayer. Product must come in contact with the odor source to be completely effective. Repeat as needed. Let air dry.

Loading Docks, Floors, Recycle Centers, Trucks & Storage Bins:

Add 1oz per gallon to a pump-up style sprayer and spray all areas inside and out. Product must come in contact with the odor source to be completely effective. Repeat as needed. Let air dry.

Product Safety

All Thornell products are safe for use on any surface. As with any product, follow the label directions. Always spot test for color fastness when being used on fabric. Care should be taken if sensitive to fragrances. Contains water, proprietary essential oil blend and preservatives. Keep out of the reach of children. For external use only.

Cautions

Effectiveness decreased when using with Chlorine solutions. Always spot test for color fastness.
